

WEB DESIGN LAB

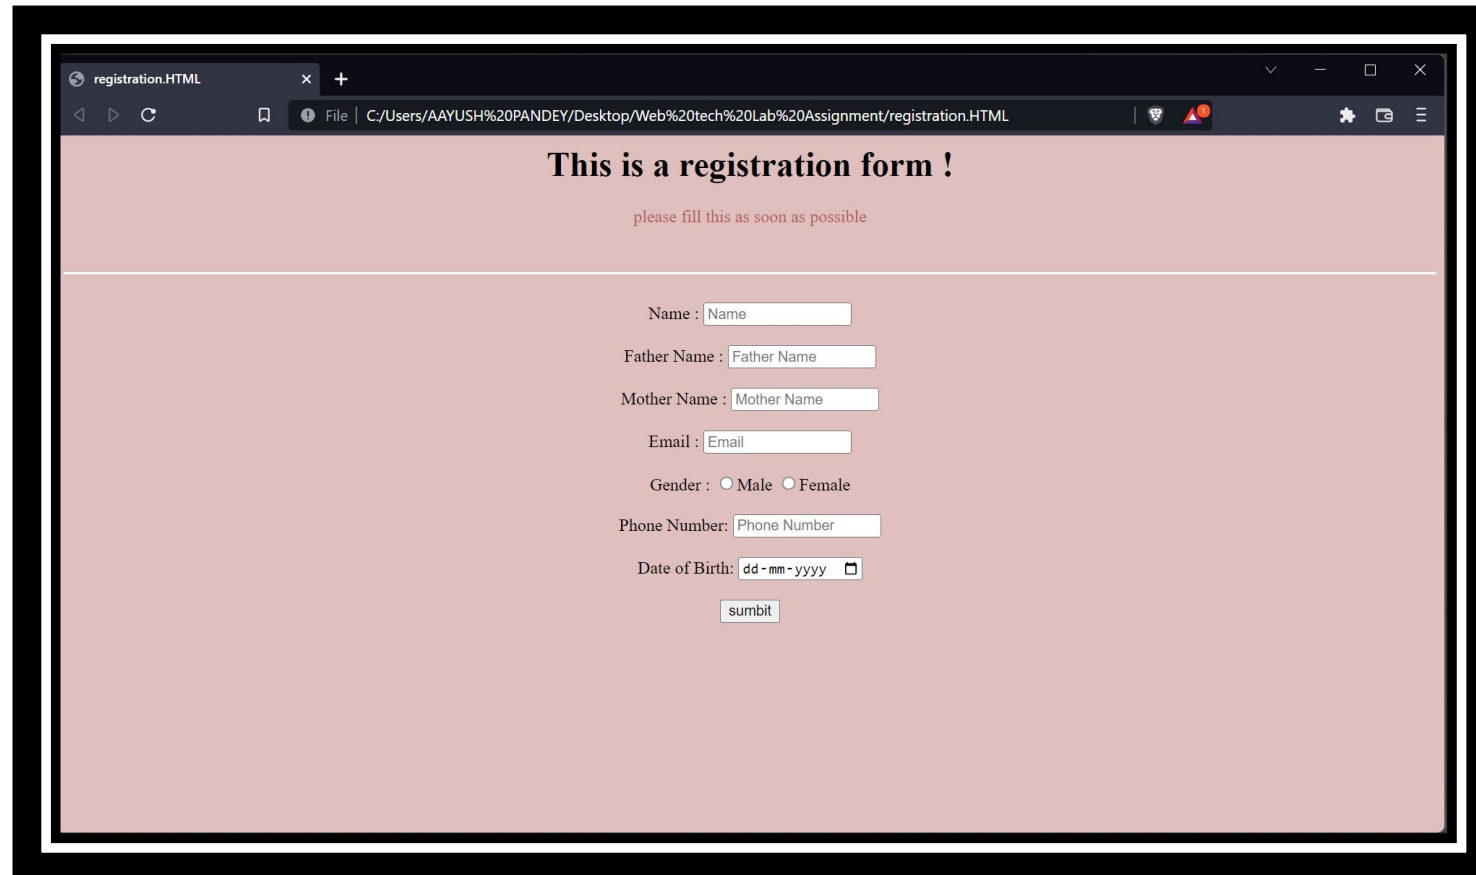

Aayush Pandey
20301

Topic 1 : To create an HTML file to link to different HTML page which contains images, tables, and also link within a page.

Topic 2: To create a registration form as mentioned below.Procedure: Create an HTML page named as “registration.HTML”

- a) set background colors
- b) use table for alignment
- c) provide font colors &size.

The screenshot shows a web browser window with a single tab titled 'registration.HTML'. The address bar shows the file path: 'C:/Users/AAYUSH%20PANDEY/Desktop/Web%20tech%20Lab%20Assignment/registration.HTML'. The page content is centered on a light pink background. At the top, it says 'This is a registration form !' in bold black text, followed by 'please fill this as soon as possible' in a smaller, lighter pink font. Below this, there is a registration form with the following fields and labels: 'Name :', 'Father Name :', 'Mother Name :', 'Email :', 'Gender :', 'Phone Number:', and 'Date of Birth:'. Each label is followed by a text input field. The 'Gender' field has two radio buttons labeled 'Male' and 'Female'. The 'Date of Birth' field has a calendar icon. At the bottom of the form is a 'sumbit' button (note the typo).

This is a registration form !

please fill this as soon as possible

Name :

Father Name :

Mother Name :

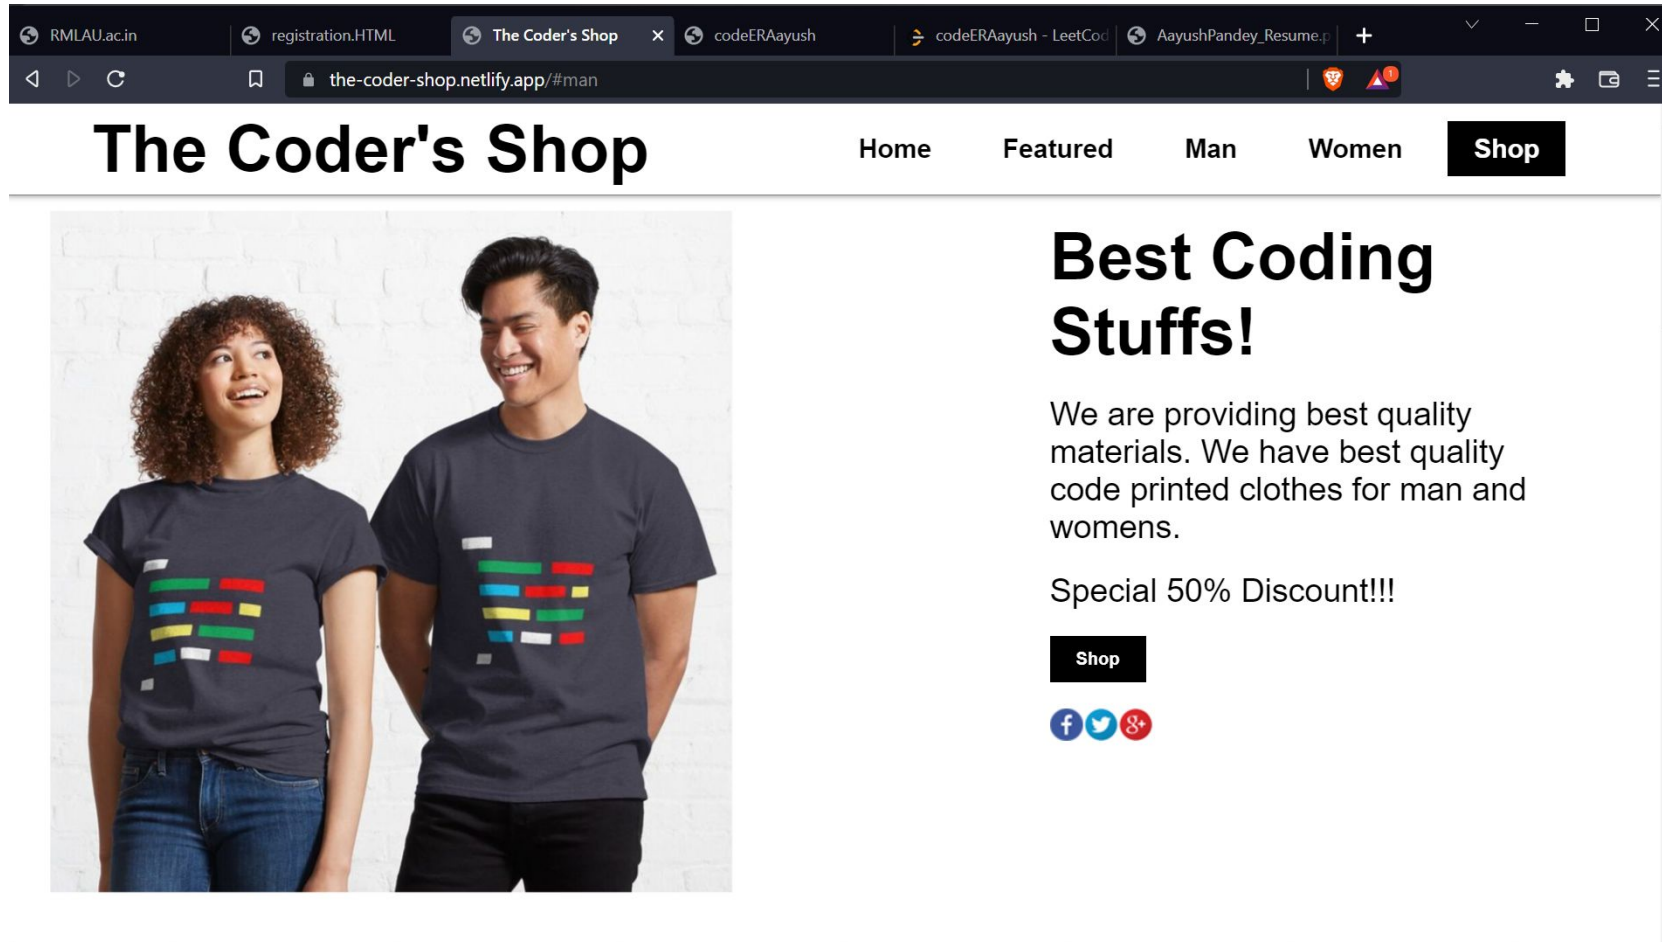

Email :

Gender : ☐ Male ☐ Female

Phone Number:

Date of Birth:
